Section B. Subject Index

Aerosols
and ice particle size in tropical cumulonimbus, 1051, 3727
did the eruption of the Mt. Pinatubo volcano affect cirrus properties?, 2806
effectiveness of two fingerprinting methods to detect trends due to sulfates, 326
effects of south Asian haze on the northeast monsoon and surface heat flux, 2462
origins of model–data discrepancies in optimal fingerprinting, 1348
reasons for larger warming projections in the IPCC third assessment report, 2945
simultaneously constraining climate sensitivity and aerosol radiative forcing, 2837
single-scattering albedo and radiative forcing with a 3D global model, 333
top of the atmosphere direct effect of aerosols over the Tropics from CERES, 1474
tropical rainfall trends and the indirect aerosol effect, 2103
Africa
rainy season dynamics and predictability in East Africa: 1968–97, 1002
statistical calibration of GCM forecasts over southern Africa, 2038
vegetation response patterns over eastern and southern Africa 1997–2000, 3096
western rainfall variability during the years 1950–90, 187
Air–sea interactions
heat exchange along the northern SST front in the tropical east Pacific, 3361
influence of ENSO teleconnections over the oceans, 2205
North Pacific decadal variability, 586
role of subseasonal SST variability in evolution of Indian monsoons, 1485
Albedo, high cloud horizontal inhomogeneity and solar albedo bias, 2321
Amazon region
TRMM observations of intraseason variability in convective regimes, 1278
using stable isotopes in validating GCM impacts of Amazon deforestation, 2664
Annual cycle
constructing the Asian–Pacific summer monsoon climatological time–space structure, 2001
radiative impact in modeling the annual cycle of sea salt, 1717
simple model study of ENSO suppression by external periodic forcing, 1088
Annular mode
external forcing of recent trend and variance increase of, 88
synchronous variability in the Southern Hemisphere atmosphere, ocean, and sea ice, 3043
variations of planetary wave activity and stratospheric cooling, 1695
Anomalies
COLA global coupled and anomaly coupled ocean–atmosphere GCM, 2301
east Asian jet stream variations, Asian–Pacific–American winter climate, 306
ENSO warm and cold event life cycles, 1118
global atmospheric sensitivity to SST anomalies in the Indo-Pacific basin, 3427
intercomparison of GCM-simulated anomalies for 1997/98 El Niño, 2791
observed impact of Atlantic SST anomalies on North Atlantic Oscillation, 606
review of atmospheric GCM response to extratropical SST anomalies, 2233
role of remote forcing in tropical Atlantic variability, 3280

SST anomalies of ENSO and Madden–Julian oscillation in the equatorial Pacific, 2429
Antarctica
air parcel trajectories and snowfall in Antarctica using theERA-15 dataset, 1957
impact of changes in ocean temperature from climate variations on the Amery Ice Shelf, 2740
remote forcing scenario for the Antarctic Circumpolar Wave, 2577
temperature sensitivity of Antarctic surface mass balance in climate models, 2758
trends in geopotential height and temperature: radiosonde vs reanalysis, 659
Anthropogenic effects
detecting anthropogenic climate change in the ocean, 879
radiative forcing due to reactive gas emissions, 2690
Anticyclones, block intensity as a diagnostic, 3459
Arctic
calibration and validation of regional climate model for pan-Arctic hydrology, 3222
Canadian Archipelago, summer surface air temperature estimation, high-resolution, 3601
comparison of Arctic climate simulations by coupled and uncoupled models, 1429
comparison of satellite retrieval of temperature to Arctic surface observations, 3698
has Arctic sea ice rapidly thinned?, 1691
memory of wintertime Arctic Oscillation persists through most of the subsequent year, 2648
North Atlantic Oscillation and the troposphere–stratosphere connection, 1969
recent temperature changes in the western Arctic during spring, 1702
Arctic Ocean, projected impact of climate change on the energy budget of the, 3028
Arctic Oscillation
influence of North Atlantic–Arctic Oscillation on temperatures in the northeast United States and Canada, 3586
memory of wintertime Arctic Oscillation persists through most of the subsequent year, 2648
Pacific center of action of the Northern Hemisphere annual mode (or Arctic Oscillation), 1987
pattern of Iberian Peninsula winter precipitation and North Atlantic atmospheric circulation, 1309
recent temperature changes in the western Arctic during spring, 1702
relationships between climate variability and winter temperature extremes, 1555
stratospheric forcing of surface climate in, 268
test for annular modes, 2537
wintertime Arctic–North Atlantic Oscillation and the role of interannual snow perturbations, 3488
Argentina, used as test for NCEP–NCAR reanalysis vs observed temperature extremes, 2089
Arizona, intraseasonal variability in wet monsoons in southeast Arizona, 2477
ARM program, cloud layer overlap characteristics derived from long-term cloud radar data, 2505
Asia
drought in central and southwest Asia, La Niña, warm pool, Indian Ocean, 697
east Asian jet stream, variations and Asian–Pacific–American winter climate anomalies, 306
east Asian summer monsoon–ENSO relationship between 1962–77 and 1978–93, 3266
establishment of the Philippine Sea anomalous anticyclone during El Niño, 3252
forced and free intraseasonal variability over the south Asian monsoon area, 2862
hydrological signatures relating the Asian summer monsoon and ENSO, 3082
variation of vertical rain profiles over Asia observed by spaceborne radar, 3443
Atlantic Ocean
Atlantic climate variability and its associated circulation cells, 1516
low-frequency variability of the tropical Atlantic Ocean, 237
process governing the recovery of a perturbed thermohaline circulation, 764
role of remote forcing in tropical Atlantic variability, 3280
Atmospheric circulation
Atlantic climate variability and its associated circulation cells, 1516
pattern of Iberian Peninsula winter precipitation and North Atlantic atmospheric circulation, 1309
Atmospheric Model Intercomparison Project
evaluation of superensemble forecast method using dataset from, 537
multimodel ensemble method comparison using output from, 793
results used to study Chinese rainfall teleconnection mechanisms, 2555
sea ice response to wind forcing from AMIP models, 522
Australia, soil moisture influence on climate variability and predictability over, 1230
AVHRR data, initial analyses and evaluations of AVHRR Pathfinder dataset, 1243
Bering Strait Throughflow, interbasin freshwater transport, thermohaline circulation sensitivity, 2516
Bias, high cloud horizontal inhomogeneity and solar albedo bias, 2321
Bias corrections, historical SST record based on marine air temperatures adjusted for, 73
Bidecadal oscillation, maximum wavelet filter, applied to, Northern Hemisphere, twentieth century, 1064
Biennial oscillation
Asian–Australian monsoon rainfall and the tropospheric, 722
sensitivity experiments testing tropospheric biennial oscillation transition conditions for Indian monsoon, 923
Block intensity, climatology of blocking anticyclones, block intensity as a diagnostic, 3459
Boreal winter circulation, variability in El Niño events, 892
Boundary layer
direct observations of response to SST variations, instability waves, 3379
entrainment, Rayleigh friction, and winds in, over the tropical Pacific, 30
simple parameterization of cloud cover in, in a global model, 1261
Brazil
active and break phases in the South American monsoon, 905
extreme precipitation events and large-scale convection patterns in South Atlantic convergence zone, 2377
predictability of northeast Brazil rainfall and real-time forecast skill, 1993
statistical prediction of northeastern Brazil's seasonal precipitation, 3411
Budgets, accuracy of atmospheric energy budgets from NCEP–NCAR and ECMWF reanalyses, 3343
Buoy observations, marine meteorological, temperature, wind and wave climatologies, trends, northeast Pacific, 3709
California, recent rainfall climatology of the Mediterranean California, 2697
Canada
estimation of summer surface air temperature in the Canadian Arctic Archipelago, 3601
homogenization of daily temperatures over Canada, 1322
Carbon dioxide
impacts of increased CO_2 on the hydroclimate of the western United States, 1926

interannual temperature and precipitation variability in CMIP2 experiments, 2395
signatures of annual and seasonal variations of, 95
Caribbean region, tropical cyclogenesis, bimodal distribution, 2897
CCM model, numerical uncertainties in simulations of isentropic processes, 1777
CCM3 model
climatology of the Community Land Surface Model coupled to CCM3, 3123
intraseasonal oscillation composite life cycle in CCM3.6, 964
sensitivity experiments testing tropospheric biennial oscillation transition conditions for the Indian monsoon, 923
CERES
examination of new CERES data for evidence of Iris effect feedback, 3719
instrument used to show that Iris hypothesis not seen in observations, 3
top of the atmosphere direct effect of aerosols over the Tropics from, 1474
Changepoint analysis, detection of undocumented changepoints in climatic time series, 2547
China
dependence of interannual rainfall on annual cycle and surface anomalies, 2555
dust storm variations in China and its climatic control, 1216
Circulation
atmospheric circulation cells associated with El Niño–Southern Oscillation, 399
change in connection from Asian monsoon to ENSO, 1203
general, impact on simulated Madden–Julian oscillations, 624
higher latitudes, influence of convection patterns in the tropical Pacific, 137
influence of large-scale flow on fall precipitation systems in the Great Lakes, 1943
Southern Hemisphere, modes of interannual variability simulated by CSIRO climate model, 1159
Walker and Hadley, Atlantic climate variability and its associated circulation cells, 1516
Circulation types, generating rainfall and temperature scenarios at multiple Mediterranean sites, 3529
Climate change
anthropogenic, detecting in the ocean, 879
application of size-robust trend statistics to temperature series shows, 117
bias corrections for historical sea surface temperature record, 73
calculation of average uncertainty and reliability, regional, 1141
comparison of two fingerprinting methods to look at changes in temperature, 326
external forcing causes recent annular mode variance increase and trend, 88
has Arctic sea ice rapidly thinned?, 1691
millennial climate variability and tidal forcing, 446
origins of model–data discrepancies in optimal fingerprinting for climate change detection, 1348
projected impact of climate change on the energy budget of the Arctic Ocean, 3028
radiative forcing due to reactive gas emissions, 2690
reasons for larger warming projections in the IPCC third assessment report, 2945
SST and cloud feedback effects on cloud parameterization in GISS GCM, 2491
Climate classification
ENSO and relationship with variability of annual precipitation by climate type, 545
of surface radiation budgets, 1175
Climate models
atmospheric response patterns associated with tropical forcing, 2184
comparison of Arctic climate simulations by coupled and uncoupled models, 1429
evapotranspiration, nitrogen controls, 278
modes of interannual variability simulated in CSIRO model for the Southern Hemisphere, 1159
paleotemperature estimates, and variability comparison with a network of tree-ring densities, 1497
regional, perturbed physics ensemble approach, tests, 2881
using stable isotopes in validating GCM impacts of Amazon deforestation, 2664
Climate prediction
combining synoptic and dynamic guidance with GCM output, 1036
interannual to decadal, relative roles of initial and boundary conditions, 3104
statistical prediction of northeastern Brazil's seasonal precipitation, 3411
Climate sensitivity
associations between stable water isotopes and climate parameters: 1979–95, 3150
generating rainfall and temperature scenarios at multiple Mediterranean sites, 3529
observationally based estimate of climate sensitivity, 3117
transient temperature response in coupled model to ocean heat uptake and, 124
Climate System Model, South Atlantic multidecadal variability in, 1408
Climate variability
and its associated circulation cells in the Atlantic, 1516
climatic influence of ENSO-caused tropical tropospheric temperature variations, 2616
directly caused by changes in stratospheric polar vortex, 268
dust storm variations in China and its climatic control, 1216
East Coast trough indices and New England winter climate variability, 3059
eastern United States, one hundred plus years of wintertime, 1076
influence of, on satellite and surface temperature trend, 2412
memory of tropical ocean dynamics, 3518
millennial climate variability and tidal forcing, 446
nonlinear dynamics in a coupled vegetation–atmosphere system, 3474
recent glacier retreat and climate internal variability, 3069
recent rainfall climatology of the Mediterranean California, 2697
relationships between climate variability and winter temperature extremes, 1555
simultaneously constraining climate sensitivity and aerosol radiative forcing, 2837
soil moisture influence on climate predictability and, 1230
structure and mechanisms of south Indian Ocean climate variability, 864
tidal connection to millennial climate variability, 370
tropical Atlantic SST forcing of, over Europe, 3170
Climatology
hydrologic cycle in the Mediterranean and its water budget implications, 1674
initial analyses and evaluations of AVHRR Pathfinder dataset, 1243
memory of wintertime AO persisting through most of the subsequent year, 2648
multiple indices of Northern Hemisphere cyclone activity in winter: 1949–99, 1573
of blizzards in the United States: 1959–2000, 1765
of recent rainfall in the Mediterranean California, 2697
of the Community Land Surface Model coupled to CCM3, 3123
surface radiation budget and climate classification, 1175
trends and variability of wind speeds in Minnesota, 3311

Clouds
aerosols and ice particle size in tropical cumulonimbus, 1051
implications of observed mesoscale variations for the earth's radiation budget, 557
influence of dynamics on changes in tropical cloud radiative forcing, 1979
role of tropical clouds in surface energy budget, 296
tropical convection, top of the atmosphere energy balance, and feedback processes: comment, 2566; reply, 2571
Cloud cover, simple boundary layer parameterization of, in a global model, 1261
Cloud feedback
Iris hypothesis as negative or positive: comment, 2713; reply, 2716
Lindzen et al.'s Iris hypothesis behaves differently in observations, 3
SST and cloud feedback effects on cloud parameterization in GISS GCM, 2491
Cloud fraction, observations and model validation of radiative transfer through broken clouds, 2921
Cloud microphysics
aerosols and ice particle size in tropical cumulonimbus, 1051, 3727
did the eruption of the Mt. Pinatubo volcano affect cirrus properties?, 2806
high cloud horizontal inhomogeneity and solar albedo bias, 2321
Cloud observations, and model validation of radiative transfer through broken clouds, 2921
Cloud overlap, overlap characteristics derived from long-term cloud radar data, 2505
Cloud parameterizations
simple boundary layer cloud cover parameterization in the NOGAPS model, 1261
SST and cloud feedback effects on cloud parameterization in GISS GCM, 2491
Cloud-resolving models, climatic properties of tropical convective precipitation, 2597
Clouds and radiation
did the eruption of the Mt. Pinatubo volcano affect cirrus properties?, 2806
high cloud horizontal inhomogeneity and solar albedo bias, 2321
observations and model validation of radiative transfer through broken clouds, 2921
Cloud vertical structure, cloud layer overlap characteristics derived from long-term cloud radar data, 2505
Common Land Model, coupling to NCAR Community Climate Model, 1832
Community Climate Model, coupling Common Land Model to NCAR Community Climate Model, 1832
Convection
climatic properties of convective precipitation in the Tropics, 2597
convection patterns in the tropical Pacific and their influence on circulation at higher latitudes, 137
deep, tropical, organized, local time- and space scales, 2775
extreme precipitation events and large-scale convection patterns in the South Atlantic convergence zone, 2377
relationship between intraseasonal variation in tropical tropopause and, 1460
tropical convection, top of the atmosphere energy balance, and feedback processes: comment, 2566; reply, 2571
using the weak temperature gradient approximation in a simple model of the Walker circulation, 2907
Convective regimes, TRMM observations of intraseasonal variability over the Amazon, 1278
Cool season
and east Asian jet stream variations, Asian–Pacific–American anomalies, 306
East Coast trough indices and New England winter climate variability, 3059
interdecadal variations in storm track intensity, Northern Hemisphere, 642
linearity of ENSO's atmospheric response, 2446
multiple indices of Northern Hemisphere cyclone activity in winter: 1949–99, 1573
multiproxy reconstruction of winter North Atlantic Oscillation index, 1754
one hundred plus years of wintertime climate variability in the eastern United States, 1076
relationships between climate variability and winter temperature extremes, 1555
review of theory and modeling of northern winter stationary waves, 2125
stratospheric connection to Northern Hemisphere winter weather, 1421
wintertime Arctic–North Atlantic Oscillation and the role of interannual snow perturbations, 3488
Coordinate systems, stratospheric wind divergence problem, 690
Coupled models
analysis of North Pacific decadal variability, 586
climate sensitivity and ocean heat uptake on transient temperature in, 124
COLA global coupled and anomaly coupled ocean–atmosphere GCM, 2301
Community Land Surface Model coupled to NCAR Community Climate Model, 3123
coupling Common Land Model to NCAR Community Climate Model, 1832
differences between equatorial Pacific as simulated in two coupled GCMs, 449
influence of ENSO teleconnections on air–sea interaction over the oceans, 2205
influence of heat, freshwater, and momentum fluxes on ocean circulation, 3686
intraseasonal variations in GCM coupled to slab ocean model, Pacific, 2989
nonlinear dynamics in a coupled vegetation–atmosphere system, 3474
North Atlantic decadal variability in the Hadley Centre, 45
sensitivity of a coupled model in the Tropics to interfacial parameterization, 1805
simultaneously constraining climate sensitivity and aerosol radiative forcing, 2837
CPTEC–COLA, GCM climatological performance evaluated, 2965
Cross-equatorial flow, and seasonal cycle of precipitation over South America, 1591
CSIRO coupled GCM, Pacific interannual–decadal equatorial variability in a 1000-yr simulation, 160
Cyclogenesis
bimodal distribution of, Caribbean basin, 2897
interannual variability in the genesis locations of tropical cyclones, 2934
Decadal variability
circulation feature associated with decadal variations of tropical cyclones, 2678
in the North Atlantic with the Hadley Centre coupled model, 45
low frequency, in the tropical Atlantic Ocean, 237
Diabatic heating, remote forcing scenario for the Antarctic Circumpolar Wave, 2577
Diagnostics, climatology of blocking anticyclones, block intensity as a diagnostic, 3459
Discriminant analysis, statistical prediction of seasonal East Coast winter storm frequency, 1101
Diurnal variability, evaluating rainfall estimates and diurnal variability of tropical rainfall, 983

Drought
1988 Oklahoma–Texas drought, mechanistic experiments, global, regional, 945
central and southwest Asia, La Niña, warm pool, Indian Ocean precipitation, 697

observationally based estimate of climate sensitivity, 3117
radiative forcing due to reactive gas emissions, 2690
radiative impact in modeling the annual cycle of sea salt, 1717
simultaneously constraining climate sensitivity and aerosol radiative forcing, 2837
top of the atmosphere direct effect of aerosols over the Tropics from CERES, 1474
tropical rainfall trends and the indirect aerosol effect, 2103
various aerosol species with a 3D global model, 333
Radiative transfer
high cloud horizontal inhomogeneity and solar albedo bias, 2321
observations and model validation of radiative transfer through broken clouds, 2921
signatures of greenhouse gas variations seen with observations and a radiative transfer model, 95
single-scattering albedo of various aerosol species with a 3D global model, 333
Radiosonde observations
comparison with reanalysis data for Antarctica, 659
evaluation of effect of Luers–Eskridge radiation adjustments, 1335
Rainfall
annual cycle and surface anomaly influence on interannual predictability of, 2555
diagnosis during 1997/98 El Niño, role of water vapor transport and waves, 512
diagnosis during 1997/98 El Niño validation of NCEP reanalysis data, 503
differences between the eastern and western Pacific rainfall systems, 3659
east Asian summer monsoon–ENSO relationship between1962–77 and 1978–93, 3266
evaluating rainfall estimates and diurnal variability of tropical rainfall, 983
generating rainfall and temperature scenarios at multiple Mediterranean sites, 3529
interannual variations in the North American summer monsoon region, 1189
in West Africa during years 1950–90, 187
linear prediction of Indian monsoon rainfall, 3645
nonlinear dynamics in a coupled vegetation–atmosphere system, 3474
pattern of Iberian Peninsula winter precipitation and North Atlantic atmospheric circulation, 1309
predictability of northeast Brazil rainfall and real-time forecast skill, 1993
summer variability in South America, linkages with SST anomalies, 1389
tropical rainfall trends and the indirect aerosol effect, 2103
tropospheric biennial oscillation and Asian–Australian monsoon, 722
variation of vertical rain profiles over Asia observed by spaceborne radar, 3443
Rain gauges, evaluating rainfall estimates and diurnal variability of tropical rainfall, 983
Rainy season
Asian–Pacific summer monsoon, 386
East African rainy season dynamics and predictability: 1968–97, 1002
Ranking methods, estimating changing extremes using empirical ranking methods, 2954
Rayleigh friction, and entrainment, boundary layer winds, over the tropical Pacific, 30
Reactive gas emissions, radiative forcing due to reactive gas emissions, 2690
Reanalysis
accuracy of atmospheric energy budgets from NCEP–NCAR and ECMWF reanalyses, 3343
assessment of surface turbulent heat fluxes over western boundary currents, 2020
climatology and interannual variability in intensity of synoptic-scale processes, 809
comparison with radiosonde data for Antarctica, 659
extreme observed temperatures as compared with those from NCEP–NCAR, 2089
stratospheric wind divergence problem in NCEP reanalysis, 690

Regional climate models
calibration and validation of regional climate model for pan-Arctic hydrology, 3222
temperature sensitivity of Antarctic surface mass balance in climate models, 2758
Regional effects
exploring structure by combining synoptic and dynamic guidance and GCMs, 1036
influence of North Atlantic–Arctic Oscillation on temperatures in the northeast United States and Canada, 3586
surface radiation budget and climate classification, 1175
Regional models
1988 Oklahoma–Texas drought, mechanistic experiments, global, NCEP, 945
impacts of increased CO_2 on the hydroclimate of the western United States, 1926
modeling of intraseasonal variations in summertime hydrologic cycle, 2282
Regional Spectral Model, regional simulation of summertime precipitation over the southwest United States, 3321
Regression analysis, detection of undocumented changepoints in climatic time series, 2547
Reliability criteria, climate change simulation, calculation of certainty and reliability, 1141
Remote sensing
evaluating rainfall estimates and diurnal variability of tropical rainfall, 983
role of subseasonal SST variability in evolution of Indian monsoons, 1485
Rossby waves, structure and mechanisms of south Indian Ocean climate variability, 864
Runoff, CCM3 Community Land Surface Model coupled to, 3123
Sahel, influence of land use change on climate, 3615
Sampling, temperature–humidity relationship simulations, sensitivity to sampling, 203
Satellite observations
comparison of satellite retrieval of temperature to Arctic surface observations, 3698
defining a top of the atmosphere flux reference level for radiation budget studies, 3301
did the eruption of the Mt. Pinatubo volcano affect cirrus properties?, 2806
differences between east and west Pacific rainfall systems, 3659
improved analysis for climate using, 1609
influence of climate variability on satellite and surface temperature trends, 2412
predictions of glacio-isostatic adjustment in measurements of sea level, 3291
signatures of greenhouse gas variations seen with radiation models and, 95
validation of satellite-derived skin sea surface temperature, 353
variation of vertical rain profiles over Asia observed by spaceborne radar, 3443
Sea ice
anomalies associated with the Southern Oscillation, 487
has Arctic sea ice rapidly thinned?, 1691
memory of wintertime Arctic Oscillation persists through most of the subsequent year, 2648
response to wind forcing from the Atmospheric Model Intercomparison Project, 522
Southern Hemisphere circulation and relations with sea ice and SST, 3058
synchronous variability in the Southern Hemisphere atmosphere, ocean, and sea ice, 3043
Sea level change, predictions of glacio-isostatic adjustment in measurements of sea level, 3291
Sea level pressure
bidecadal oscillation, Northern Hemisphere, twentieth century, 1064
patterns from EOF analysis can be misleading, 216
Sea salt, radiative impact in modeling the annual cycle of sea salt, 1717
Seasonal cycle, temporal and spatial evolution of the Asian summer monsoon, synoptic fields, 3630
Seasonal effects, tropical, ocean–atmosphere instability strength, thermocline, 2721
Seasonal forecasting
intra-annual analysis of North American snow cover–monsoon teleconnection, 1743
performance of superensemble method for, 537
verification of International Research Institute net assessment forecasts for 1997–2000, 1369
Seasonal variability, seasonal change of atmospheric heat budget over the Southern Ocean, 2527
Sea surface temperature
air–sea heat exchange along the northern SST front in the tropical east Pacific, 3361
anomalies, linkages between summer rainfall variability, South America, 1389
anomalies of ENSO and the Madden–Julian oscillation in the equatorial Pacific, 2429
atmospheric response patterns associated with tropical forcing, 2184
bias corrections for record of historical SSTs, 73
bidecadal oscillation, Northern Hemisphere, twentieth century, 1064
cloud feedback effects on cloud parameterization in the GISS GCM, 2491
dipolelike variability in the tropical Indian Ocean, 1358
direct observations of atmospheric boundary layer response to SST variation, 3379
effects of penetrative radiation on upper tropical ocean circulation, 470
ENSO warm and cold event life cycles and ocean surface anomaly patterns, 1118
examination of new CERES data for evidence of Iris effect feedback, 3719
global atmospheric sensitivity to SST anomalies in the Indo-Pacific basin, 3427
Gulf of California SSTs and North American monsoon, observations, 2261
improved in situ and satellite climate analysis of, 1609
interannual anomalies in tropical tropospheric temperature and, 2702
intraseasonal variations in GCM coupled to slab ocean model, Pacific, 2989
linearity of ENSO's atmospheric response, 2446
MJO-related, SST variations in the tropical eastern Pacific, 675
new statistical time series prediction method based on temporal EOFs, 226
observed impact of Atlantic SST anomalies on North Atlantic Oscillation, 606
oceanic influence on North Atlantic climate variability, 1911
patterns from EOF analysis can be misleading, 216
predictability of northeastern Brazil's rainfall and real-time forecast skill, 1993
predictability of zonal-mean height fields, 420
reemergence of anomalies in the North Atlantic, 2707
regulation of SST in the tropical western Pacific, 1626
relation between precipitation in southwestern South America, 251
review of the atmospheric GCM response to extratropical SST anomalies, 2233
role of remote forcing in tropical Atlantic variability, 3280
role of SSTs in ENSO–North Pacific Oscillation interactions, 1295
role of subseasonal SST variability in evolution of Indian monsoons, 1485

south-central Pacific, relation between precipitation in southwestern South America, 251
Southern Hemisphere circulation and relations with sea ice and SST, 3058
statistical prediction of northeastern Brazil's seasonal precipitation, 3411
tropical Atlantic SST forcing of climate variability over Europe, 3170
using the weak temperature gradient approximately in a simple model of Walker circulation, 2907
validation of satellite-derived skin temperature, 353
variability in the North Pacific, 586
variability of mixed layer, balance on intraseasonal timescales, equatorial Pacific, 2632
Sensitivity studies
observed and simulated temperature–humidity relationships, sensitivity to sampling and analysis, 203
sensitivity experiments testing tropospheric biennial oscillation transition conditions for Indian monsoon, 923
Shortwave radiation, effects of penetrative radiation on the upper tropical ocean circulation, 470
Signal recognition techniques, South Atlantic multidecadal variability in the Climate System Model, 1408
Simulation, differences between the equatorial Pacific as simulated in two GCMs, 449
Single-column models, sensitivity of a coupled model in the Tropics to interfacial parameterization, 1805
Singular vectors, tropical axisymmetric mode of variability in the atmospheric circulation, 1537
Skin sea surface temperature, validation of satellite-derived skin temperature, 353
Snow
North American monsoon and relation between the U.S. southwest summer rain and snow mass, 1378
wintertime Arctic–North Atlantic Oscillation and the role of interannual snow perturbations, 3488
Snow cover, intrannual analysis of North American snow cover–monsoon teleconnection, 1743
Snowfall, air parcel trajectories and snowfall in Antarctica using the ERA-15 dataset, 1957
Soil moisture
impact on monsoon interannual variability, 701
influence on climate variability and predictability over Australia, 1230
Solar cycle, quasi-decadal modulation of the quasi-biennial oscillation period, 2562
South America
active and break phases in South American monsoon, 905
cross-equatorial flow and seasonal cycle of precipitation over, 1591
diagnosis during 1997/98 El Niño, validation of NCEP–NCAR reanalysis data, 502
diagnosis of rainfall during 1997/98 El Niño, role of water vapor transport, 512
midsummer low-level climate in subtropical South America and related SST anomalies, 3394
summer rainfall, variability, linkages with SST anomalies, 1389
South Atlantic convergence zone
extreme precipitation events and large-scale convection patterns in the, 2377
midsummer low-level climate in subtropical South America and related SST anomalies, 3394
predictability of northeastern Brazil's rainfall and real-time forecast skill, 1993
variability simulated by an atmospheric general circulation model, 745
South Atlantic Ocean, multidecadal variability in the Climate System Model, 1408
Southern Hemisphere
circulation and relations with sea ice and SST, 3058
ENSO evolution during 1981–99, 847
synchronous variability in the Southern Hemisphere atmosphere, ocean, and sea ice, 3043
Southern Ocean, seasonal change of atmospheric heat budget over the, 2527
Southern Oscillation, effect on sea ice anomalies and ocean climate, 487
Southwest region
North American monsoon and relation between snow mass and summer rain in, 1378
regional simulation of summertime precipitation over the southwestern United States, 3321
simulation of intraseasonal variations in the summertime hydrologic cycle, 2282
Spring season, recent temperature changes in the western Arctic during spring, 1702
SST anomalies
linkages between summer rainfall variability, South America, 1389
midsummer low-level climate in subtropical South America and related SST anomalies, 3394
onset of the summer monsoon over the Indochina Peninsula: climate and variations, 3206
remote forcing scenario for the Arctic Circumpolar Wave, 2577
South Atlantic convergence zone variability simulated by a GCM, 745
Stationary waves
dynamical aspects of extratropical tropospheric low-frequency variability, 2145
review of theory and modeling of northern winter stationary waves, 2125
Statistical downscaling
daily mean temperature, central Europe, 1731
generating rainfall and temperature scenarios at multiple Mediterranean sites, 3529
Statistical models, comparison of some ENSO, 8
Statistical techniques
detection of undocumented changepoints in climatic time series, 2547
estimating changing extremes using empirical ranking methods, 2954
patterns from EOF analysis can be misleading, 216
Statistics
evaluation of superensemble forecasts using, 537
global warming in temperature series seen with size-robusttrend statistics, 117
Storm tracks
interdecadal variations in Northern Hemisphere winter storm track intensity, 642
modulation in Pacific storm tracks and east Asian winter monsoon, 1855
review of observations, theory, and modeling of storm track dynamics, 2163
Stratosphere, forcing of surface climate in the Arctic Oscillation, 268
Stratospheric circulation, relationship of ozone and tropospheric waves to, 3673
Stratospheric cooling, interannual and decadal variations of planetary wave activity, Northern Hemisphere annular, 1659
Stratospheric–tropospheric coupling,
downward-propagating temperature anomalies in the preconditioned stratosphere, 781
stratospheric connection to Northern Hemisphere winter weather, 1421
test for annular modes, 2537
Superensemble modeling method
Brier skill score and Atmospheric Model Intercomparison Project dataset used to evaluate, 537
performance of, vs other ensemble techniques, 793

Surface air temperature, memory of wintertime Arctic Oscillation persists through most of the subsequent year, 2648
Surface fluxes
effects of south Asian haze on the northeast monsoon and surface heat flux, 2462
long-term hydrological dataset of land surface fluxes for the United States, 3237
Surface observations
comparison of satellite retrieval of temperature to Arctic surface observations, 3698
influence of climate variability on satellite and surface temperature trend, 2412
longwave radiation in ECMWF forecast system compared to measurements, 1875
Synoptic climatology, influence of large-scale flow on fall precipitation systems in Great Lakes, 1943
Synoptic fields, temporal and spatial evolution of the Asian summer monsoon, seasonal cycles, 3630
Synoptic-scale processes, dynamical aspects of extratropical tropospheric low-frequency variability, 2145
Teleconnections
atmospheric response patterns associated with tropical forcing, 2184
doubt cast on traditional physical mechanisms to explain Chinese rainfall, 2555
establishment of the Philippine Sea anomalous anticyclone during El Niño, 3252
global atmospheric sensitivity to SST anomalies in the Indo-Pacific basin, 3427
influence of ENSO teleconnections on air–sea interaction over the oceans, 2205
intra-annual analysis of North American snow cover–monsoon teleconnection, 1743
jet stream waveguide, North Atlantic Oscillation, and circumglobal, 1893
North Pacific short-wave train during the extreme phases of ENSO, 2359
Pacific center of action of the Northern Hemisphere annual mode (or Arctic Oscillation), 1987
tropospheric biennial oscillation and Asian–Australian monsoon rainfall, 722
Temperature
bias corrections for record of historical SST based on marine air temperature, 73
climatic influence of ENSO-caused tropical tropospheric temperature variations, 2616
comparison of satellite retrieval of temperature to Arctic surface observations, 3698
effectiveness of two fingerprinting methods to detect sulfate-induced, 326
empirically downscaled ensemble temperature and precipitationfor Norway, 3008
evaluation of the effect of Luers–Eskridge radiation adjustment on radiosonde temperatures, 1335
homogenization of daily temperatures over Canada, 1322
influence of climate variability on satellite and surface temperature trends, 2412
influence of NAO–AO on temperatures in the northeast United States and Canada, 3586
interannual anomalies in tropical tropospheric and SST, 2702
interannual variability in 19 CMIP2 experiments, CO_2-induced changes, 2395
intraseasonal variation in tropical coldpoint tropopause, 1460
NCEP–NCAR reanalysis as compared with observed extreme temperatures, 2089
ocean, mixed layer, balance on intraseasonal timescales, equatorial Pacific, 2632
recent temperature changes in the western Arctic during spring, 1702
sea surface, relation between precipitation in southeastern South America, 251
sensitivity of Antarctic surface mass balance in climate models, 2758
size-robust trend statistics show global warming in historical series of, 117
statistical downscaling of daily, in central Europe, 1731
surface air, estimation, high-resolution, Canadian Arctic Archipelago, 3601
trends, marine meteorological buoys, northeast Pacific, 3709
verification of International Research Institute net assessment forecasts for 1997–2000, 1369
with humidity, observed and simulated relationships, sensitivity to sampling and analysis, 203
Temperature anomalies, downward-propagating in the preconditioned polar stratosphere, 781
Terrain-following coordinates, source of NCEP reanalysis problem, 690
Thermocline
equatorial, seasonal control, tropical Pacific ocean–atmosphere strength, 2721
wind-driven variability in the Pacific, 829
Thermohaline circulation
global, sensitivity to interbasin transport, Bering Strait Throughflow, 2516
limited predictability close to an instability threshold, 179
mechanisms of thermohaline mode switching for warm equable climates, 2056
process governing the recovery of a perturbed thermohaline circulation, 764
Three-dimensional models, single-scattering albedo and radiative forcing of aerosol species, 333
Tides
millennial climate variability and tidal forcing, 446
millennial climate variability, tidal connection, 370
Tide gauge measurements, predictions of glacio-isostatic adjustment in measurements of sea level, 3291
Time series
detection of undocumented changepoints in climatic time series, 2547
estimating changing extremes using empirical ranking methods, 2954
homogenization of daily temperatures over Canada, 1322
Trajectories, air parcel trajectories and snowfall in Antarctica using the ERA-15 dataset, 1957
Transport, radiative impact in modeling the annual cycle of sea salt, 1717
Tree-ring densities, network, paleotemperature estimates, comparison with climate model, 1497
Trends
external forcing causes recent annular mode variance increase and, 88
in twentieth century, U.S. temperature extremes, 3188
size-robust statistics applied to temperature record show warming, 117
TRMM, observations of intraseasonal variability in convective regimes over the Amazon, 1278
Tropical cyclones
circulation feature associated with decadal variations of activity, 2678
how strong ENSO events affect tropical storm activity over the North Pacific, 1643
interannual variability in the genesis locations of tropical cyclones, 2934
little evidence of a hurricane trend in the North Atlantic basin, 3111
Tropical deep convection, local time- and space scales, 2775
Tropics
aerosols and ice particle size in tropical cumulonimbus, 3727
atmospheric response patterns associated with tropical forcing, 2184

bimodal distribution of cyclogenesis in the Caribbean basin, 2897
climatic influence of ENSO-caused tropical tropospheric temperature variations, 2616
climatic properties of tropical convection, 2597
examination of new CERES data for evidence of Iris effect feedback, 3719
intraseasonal variation in coldpoint tropopause temperatures in, 1460
memory of tropical ocean dynamics, 3518
regulation of SST in the tropical western Pacific, 1626
relationship between anomalies in tropospheric and sea surface temperatures, 2702
role of remote forcing in tropical Atlantic variability, 3280
role of tropical clouds in the surface energy budget, 296
sensitivity of a coupled single-column model parameterization to interfacial, 1805
top of the atmosphere direct effect of aerosols over the Tropics from CERES, 1474
tropical Atlantic SST forcing of climate variability over Europe, 3170
tropical axisymmetric mode of variability in the atmospheric circulation, 1537
tropical convection, top of the atmosphere energy balance, and feedback processes: comment, 2566; reply, 2571
tropical rainfall trends and the indirect aerosol effect, 2103
Tropopause, intraseasonal temperature variations of the tropical coldpoint, 1460
Troposphere, temperatures related to SST in the Tropics, 2702
Two-dimensional models, using the weak temperature gradient approximation in a simple model of Walker circulation, 2907
United States
climatology of blizzards in the United States: 1959–2000, 1765
East Coast trough indices and New England winter climate variability, 3059
long-term hydrological dataset of land surface fluxes for the United States, 3237
one hundred plus years of wintertime climate variability in eastern, 1076
regional simulation of summertime precipitation over the southwestern United States, 3321
trends in twentieth century, U.S. temperature extremes, 3188
Vegetation–climate interaction, nonlinear dynamics in a coupled vegetation–atmosphere system, 3474
Vegetation indices, vegetation response patterns over eastern and southern Africa 1997–2000, 3096
Walker circulation, using the weak temperature gradient approximation in a simple model of Walker circulation, 2907
Warm season
Asian–Pacific rainy season, 386
estimation of surface temperature, high-resolution, Canadian Arctic Archipelago, 3601
interannual rainfall variations in the North America summer monsoon region, 1189
onset time, onset of the summer monsoon over the Indochina Peninsula: climate and variations, 3206
predictability of zonal-mean height fields, 420
regional simulation of summertime precipitation over the southwest United States, 3321
structure of the ITCZ in the west Pacific during boreal summers: 1989–93, 3549
Water budget
hydrologic cycle in the Mediterranean and its implications on, 1674
long-term hydrological dataset of land surface fluxes for the United States, 3237
Water vapor
robustness of water vapor feedback and GCM vertical resolution and formulation, 917
role of water vapor transport in diagnosis of rainfall over South America during 1997/98 El Niño, 512
Waves
atmospheric, North Pacific short-wave train during the extreme phases of ENSO, 2359
trends, marine meteorological buoys, northeast Pacific, 3709
tropospheric, relationship of ozone and tropospheric waves to stratospheric circulation, 3673
Waveguide, circumglobal teleconnections, North Atlantic Oscillation, and jet stream, 1893
Wavelet filter, applied to bidecadal oscillations for the Northern Hemisphere in the twentieth century, 1064
Western Pacific Ocean
regulation of SST in the tropical western Pacific, 1626
structure of the ITCZ in the west Pacific during boreal summers: 1989–93, 3549
Winds
entrainment, Rayleigh friction, and boundary layer, over the tropical Pacific, 30
quasi-decadal modulation of the quasi-biennial oscillation period, 2562
trends from marine meteorological buoys, northeast Pacific, 3709
Wind forcing, sea ice response to wind forcing from Atmospheric Model Intercomparison Project models, 522
Wind speed
analysis of, in northwest Europe using generalized linear models, 2073
rectified wind forcing and latent heat flux produced by the Madden–Julian oscillation, 3500
trends and variability of, in Minnesota, 3311
Wind stress
ENSO warm and cold event life cycles and ocean surface anomaly patterns, 1118
influence of heat, freshwater, and momentum fluxes on ocean circulation, 3686
Winter storms
climatology of blizzards in the United States: 1959–2000, 1765
statistical prediction of seasonal East Coast frequency, 1101
